## LAB WORK\_01

```

/*****
 * Create a BlueJ project, call is Hello and print out
 * screen the string "Hello world"
 *
 * @author (Van Nguyen)
 * @version (Sunday January 23th, 2022)
 *****/

// A program in java that prints "Hello world"

public class Hello          // class header Hello
{
    public static void main (String[] args)    // method header
    {
        System.out.print( " Hello world! " ); /* output to screen a
                                                string Hello world */
    }
    // the end.
}

```

Print output
